

COURSE HANDOUT

Course Code	ACSC13
Course Name	Design and Analysis of Algorithms
Class / Semester	IV SEM
Section	A-SECTION
Name of the Department	CSE-CYBER SECURITY
Employee ID	IARE11023
Employee Name	Dr K RAJENDRA PRASAD
Topic Covered	Spanning trees
Course Outcome/s	Construct the spanning trees from graphs
Handout Number	22
Date	

Content about topic covered : Spanning Tree

- * Spanning tree is a sub-graph of a graph.
- * undirected connected graph.
- * A spanning tree must contain all the vertices, if any vertex is not there then it is not a spanning tree.
- * A spanning tree should include vertex with the least possible no. of edges.
- * A spanning tree doesnot have any cycle.
- * A spanning tree consists of $(n-1)$ edges where, n is the no. of vertices or nodes.

* A complete graph can have maximum of n^{n-2} no. of spanning trees.
 ↳ Cayley's Formula.

Another Example of spanning trees with 4 nodes
